PROFESSIONAL SUMMARY

UX Designer with 3+ years of experience in digital product design at a global corporate environment (SAP), specializing in interaction design, end-to-end user flows, and AI-powered experiences across web and mobile. Proficient across the full design cycle — user research, information architecture, low-to-high fidelity prototyping, and developer handoff in Figma. Hands-on experience applying Responsible AI principles, human-in-the-loop patterns, and conversation design to real product contexts. Proven ability to collaborate with cross-functional, globally distributed teams spanning research, product management, and engineering, translating ambiguity into clear, evidence-based design decisions. Certified in Accessible Design. Trilingual (PT/EN/ES).

PROFESSIONAL EXPERIENCE

Mid-Level UX Designer | Agromai

Apr 2026 – Present

- ▶ Lead end-to-end interaction design for an agtech platform — defining user stories, creating user flows, and producing low-to-high fidelity prototypes for web and mobile experiences.
- ▶ Apply the ADS (Advanced Design System) to ensure interface consistency and scalability, collaborating with design systems partners on component evolution and pattern standardization.
- ▶ Conduct user research and usability tests to ground decisions in real user needs, translating insights into actionable design improvements.
- ▶ Integrate AI-assisted prototyping into the design workflow to accelerate iteration and generate interface variations for rapid stakeholder feedback.

UX Design Intern • Globalization Team | SAP

Aug 2025 – Apr 2026

- ▶ Led the complete design cycle for 2 global digital products — information architecture, wireframes, high-fidelity prototypes, and developer handoff in Figma — reducing review cycles by ~30%.
- ▶ Conducted heuristic analyses, usability tests, and A/B tests, generating data-driven improvements that raised user satisfaction scores across 2 consecutive sprints.
- ▶ Collaborated with PMs and engineers across global teams, articulating design rationale with evidence and accelerating 4 critical deliveries.
- ▶ Built fluency across multiple product areas to ensure end-to-end journey consistency beyond immediate scope, balancing ideal UX with technical constraints and system realities.

Business AI Intern • Business AI Team | SAP

Dec 2024 – Aug 2025

- ▶ Designed interfaces for SAP agentic AI products, applying Responsible AI principles — anticipating potential harms, embedding guardrails, and making AI reasoning explainable and trustworthy for end users.
- ▶ Applied AI Journey Mapping to design end-to-end human-AI experiences, mapping human-in-the-loop patterns and determining what to automate vs. augment at critical decision points.
- ▶ Used Context Engineering to craft and optimize prompts, generating accurate AI outputs aligned with design workflows; evaluated outputs for correctness, bias, and privacy compliance.
- ▶ Managed the Torneo de Innovación 2025 end-to-end, aligning 5+ stakeholders across global teams and delivering 100% of milestones on time.

Marketing & Events Intern • Labs Events Team | SAP

Apr 2024 – Dec 2024

- ▶ Produced 30+ responsive visual assets in Figma and Adobe Suite, collaborating with product, technology, and marketing teams across the globe.
- ▶ Optimized the management of 10+ simultaneous projects in an agile Kanban environment, reducing delivery blockers by ~25% and improving sprint predictability.

- ▶ Designed user-centered interfaces and assets for product digital campaigns across LATAM, maintaining visual consistency and accessibility standards in 100% of deliverables.
- ▶ Mapped and improved operational workflows for the LATAM Field Marketing team, reducing manual rework by ~20% through clear documentation and standardized processes.

SKILLS

Interaction Design	User flows · Information architecture · Low-to-high fidelity prototyping · User stories · End-to-end journey design
Platforms	Web · Native iOS · Android · Responsive & Mobile-first design
Design Systems	Component libraries · Pattern standardization · ADS · Fiori Design System · Developer handoff in Figma
Research & UX	Usability testing · Heuristic analysis · A/B testing · User interviews · Data-driven design · Evidence-based decisions
AI & Design	AI-powered feature design · Responsible AI (privacy, bias, explainability) · Human-in-the-loop patterns · Conversation design · Context Engineering · AI Journey Mapping
Accessibility	Accessible Design (certified) · WCAG guidelines · Inclusive design
Collaboration	Cross-functional & globally distributed teams · Agile/Scrum · Kanban · Stakeholder management
Tools	Figma · Adobe Illustrator · Adobe Photoshop · Canva
Languages	Portuguese (native) · English C1 · Spanish B2

EDUCATION & CERTIFICATIONS

Professional Certification in UX/UI Design EBAC – British School of Creative Arts	Mar 2026
Practical Applications of Accessibility in Design Tudo é Acessibilidade	Nov 2025
Applied Figma EBAC – British School of Creative Arts	May 2025
B.A. in Business Administration (in progress) UFRGS – Federal University of Rio Grande do Sul	Jul 2022 – Jul 2027
